# Next Steps

## GET STARTED ON YOUR DIY SOLAR PROJECT

---

### **SPEAK WITH YOUR ENERGY CONSULTANT**

Your consultant will create a preliminary solar design and ensure you have a smooth and successful project.

SPEAK WITH YOUR ENERGY CONSULTANT  
**[CLICK HERE TO SCHEDULE](#)**

### **ORDER YOUR PLAN SET**

A Plan Set is required for solar systems to obtain permitting. It is a blue print for your system and installation. The \$500 Plan Set payment will count towards the cost of your Solar in a Box Kit.

### **SUBMIT YOUR DIY SITE SURVEY**

Once a plan set is ordered you will receive instructions on how to complete a site survey of your home. This provides our designers and engineers the information needed to build your Plan Set.

### **INSTALL YOUR SYSTEM**

Once all required permits have been obtained, it's time to install! To make it easy you will be provided a step by step install guide and have access to our resource center. If at any point you get stuck our guides, videos, instruction manuals, and real life professionals are here to help you install your own solar!
